Haha! Must be some kind of convergence in the cosmos. I don't know the PCB/universal waste question, but will find out. Thx!

John see below in yellow, as something to consider:

## A. <!--[if !supportLists]--><!--[endif]-->Third-Party Compliance Projects

Activities that are legally required of any party are generally prohibited as SEPs. Under some circumstances, however, an exception may be appropriate, but requires prior Headquarters approval from the appropriate media enforcement division director in OECA (*see* Section XII.A.5). Exceptions to this prohibition have been granted where:

1. The SEP involves a defendant's implementation of an activity that is legally required of residents of a community with environmental justice concerns (*e.g.*, maintaining or establishing connection to a sewer lateral line);
2. The residents are financially unable to comply with the legal requirement; and

3. The SEP provides significant public health and/or environmental benefits.

A specific exception has been made for chemical clean-out projects in schools. Although schools may be required to manage chemicals and hazardous wastes appropriately, many lack the skills and resources to do so. SEPs that identify, remove and properly dispose of hazardous chemicals from schools are acceptable under certain conditions, given their impact on children's health and communities with EJ concerns. Such projects <sup>may be acceptable when:</sup>

1. The recipient school is a primary or secondary public school;
2. The project provides a one-time identification, removal, and proper disposal of chemicals and/or hazardous wastes; and
3. The project includes a beyond-compliance component, such as establishing a chemical tracking system.

As with all third-party compliance projects, prior Headquarters approval from the appropriate media enforcement division director in OECA is required (*see* Section XII.A.5).
